Subject to change

\* On request

Speed control range from 800 rpm<sup>-1</sup> at 7% PWM up to nominal speed at > 90% PWM. Standstill at 0% PWM. Standstill if control cable is interrupted.

The specific service life is valid when an external capacitor is wired between the positive and negative wires. Please note the wiring suggestion.

Air performance measured according to: ISO 5801.  
Installation category A, without contact protection.  
Noise: Total sound power level L<sub>WA</sub> ISO 103002  
measured on a hemisphere with a radius of 2 m.  
Sound pressure level L<sub>PA</sub> measured at 1 m distance  
from fan axis.  
The values given are applicable only under the specified  
measuring conditions and may differ depending on the  
installation conditions.  
In the event of deviation from the standard configuration,  
the parameters must be checked after installation!  
For detailed information see  
<http://www.ebmpapst.com/general-conditions>
