

SELV MOD-BUS CONTROL OUT/IN

CONTROL OPTIONS (customer's circuit) :

Max. speed analog input sensor potentiometer PWM analog input
0-10V (Variable resistance) frequency input 0-20mA
1-10kHz

NOTE:
Please read additional instructions about
HIDRIA EC MOD-BUS Parameters and
about control options.

WARNING:

- Before opening connection box switch off electric power!
- Dangerous voltages, capacitor discharge time 5min!

NOTE:

Please read user's guide for more instructions
about control options and before putting the fan into
operation.

Leakage current exceeds 3.5mA!
